128	T18, T14, D16	87	T17, D18	46	14, D16
127	T19, T18, D8	86	T18, D16	45	13, D16
126	T20, T16, D9	85	T15, D20	44	12, D16
125	B, T20, D20	84	T20, D12	43	11, D16
124	T20, T14, D11	83	T17, D16	42	10, D16
123	T19, T16, D9	82	T14, D20	41	9, D16

Each season, ADDA tracks each player's average points per throw during 501 games. This helps us rate players on their performance.

During the singles 501 games, the scorekeeper will keep track of how many darts are thrown by each player and score remaining of each player at the end of the game. Each team captain will record the results on the score sheet. The number of darts thrown and score left are essential to the calculation of 501 averages.

As you will see on the score sheet, under the right hand column labeled "Individual Player Stats", there are boxes to report each player's "DT" or Darts Thrown and "SL" or Score Left. It is important to note, if a player "busts" at the end of the game, only the darts thrown during that turn should be counted in the DT (if you bust with your first dart, only one dart counts toward the DT).

You will NOT have to calculate your average, but it is explained here so you can understand how it works. Your 501 Average is a "per dart" average, meaning it is the average number of points you score per dart during your 501 game. The average is calculated by subtracting the Score Left from 501 and dividing that number by the Darts Thrown.

For example, a fellow by the name of Justin gets pummeled by a fellow the name of Gus, in a 501 game. Gus wins the game in 19 darts (so his DT is 19), while Justin threw 18 darts and has a score left of 292 (his DT is 18 and SL is 292). Since he won the game, Gus' Score Left is zero.

Gus' 501 average for that week would be:
 $(501-0)/19 = 26.3684$ points per dart (ppd).

Justin's average for that week would be:
 $(501-292)/18 = 11.6111$ ppd.

Each player's points per dart are averaged each week to give an overall season average. The player in each division at the end of the season, with at least 7 qualifying games in the A-D Divisions and at least 5 qualifying games in the E and F Divisions, will be awarded a cash prize for being the 501 High Average Champion.
